We are delighted to present the prospectus for the Annual Conference of the International Society of Presbyopia (ISOP). As a premier event in the field of presbyopia, this conference serves as a cornerstone for collaboration, innovation, and excellence in vision care. With a rich history of bringing together renowned practitioners, research scientists and companies which provide the products necessary for the correction in patients, the ISOP conference offers a dynamic platform for advancing knowledge, sharing insights, and shaping the future of presbyopia management. All of these elements are necessary for a treatment to reach the patient. This year's congress will continue to provide a place to learn about the latest research in the field, to get a sense of which things work and which don't, and to see what is coming in future.

The annual conference connects our global community of professionals and serves as a major educational and networking opportunity for those interested in optical sciences and presbyopic correction. The nominal registration fee allows access to a larger audience however does not cover program expenses for administrative, food and beverage and onsite production/AV. No presenters are paid to speak at this event.

Consistent with past years, the conference will take place one day prior to the commencement of ESCRS. We anticipate a turnout of approximately 175 attendees for this one-day event.
